Maame Yaa Akoto-Sampong

WEB DEVELOPER

I am a web developer trainee with a passion for problem-solving and creativity. Currently, I am building strong foundations in coding languages and web technologies, with a collaborative mindset and clear communication skills. Eager to contribute to innovative digital projects that improve user experience and support business goals.

PROJECTS

1. **Wedding RSVP Form**

GitHub: Wedding-RSVP-form

Summary: A clean and responsive RSVP form designed for wedding guests to confirm attendance. This project demonstrates the use of semantic HTML and CSS to create an accessible and user-friendly form interface. The structure supports form inputs for names, attendance options, and meal preferences (or similar custom inputs).

Key Features:
- Semantic HTML5 form structure
- Responsive layout using CSS
- Accessible form elements with proper label associations
- Great practice of real-world event website components

Skills Practiced: HTML5, CSS3, Form Handling, Responsive Design, Accessibility

2. **Invitation Card**

GitHub: Invitation-Card

Summary: A simple, stylish web-based invitation card built using HTML and CSS. This project showcases creativity in layout and design, mimicking traditional printed invitations using modern web elements. It's an elegant demonstration of structure, design alignment, and visual hierarchy.

Key Features:
- Eye-catching design with centered layout
- Custom styling for event details
- Strong use of CSS properties like typography, alignment, and spacing
- Great for demonstrating attention to detail in static layouts

Skills Practiced: HTML5, CSS3, Visual Design, Layout Skills
